HALOPAR 162030

HALOPAR 16/20/30

Halogen at the flick of a switch

With HALOPAR 16/20/30 from OSRAM, halogen light is easy to install. The lamps can be screwed into a conventional E14 or E27 holder as $10\hat{A}^\circ$ spot or $30\hat{A}^\circ$ flood reflector lamps. And that's it! HALOPAR 16/20/30 lamps are high-quality modern alternatives to conventional reflector lamps. Twice as much light as standard incandescent reflector lamps and twice the life $\hat{a} \in$ a powerful combination. OSRAM HALOPAR 16/20/30 lamps are therefore ideal for effective accent lighting.
