HALOSPOT 4870

HALOSPOT 48/70

For even distribution of light

Putting things in a better light: Thanks to their excellent spotlighting and extremely high luminous intensity, HALOSPOT 48 and 70 from OSRAM are true professionals in displaying rooms and objects in the right light. The faceted reflector ensures the light is very evenly distributed.

With all the HALOSPOT lamps there is no need to worry about heat building up behind suspended ceilings and the aluminum reflector radiates the heat forwards.
