DECOSPOT LED

DECOSPOT LED

Decisive use of color

Bringing color to individual lighting design. Thanks to the PAR16 reflector form and familiar E14 and GU10 bases, they can be used to create new accents in the blink of an eye. Specific use of color can add an elegant and modern freshness to the rooms we live in. You can create special effects with DECOSPOT® LED colorchange, in which the various colors change automatically.
