## Line voltage

### Bright ideas for professionals

The long-life high-intensity OSRAM halogen lamps for line voltage are the perfect solution to a wide range of challenges in the professional sector. The innovative range for line voltage lighting includes lamps such as HALOPIN, DECOPIN, HALOPAR, HALOLINE, HALOLUX and the energy-saving and cost-saving ECO versions. What's more, unlike with some line voltage halogen lamps available on the market, there is no risk that OSRAM lamps will explode at the end of their lives and cause damage. All OSRAM line voltage halogen lamps meet the strict requirements of the IEC 60432-2 standard to safeguard against any warranty-related consequences.\*

\* For HALOLINE lamps from OSRAM a fuse that complies with IEC 60357 must be provided on the luminaire side.

### HALOGEN ENERGY SAVER

Now it is very easy to switch over to climate protection. HALOGEN ENERGY SAVER lamps are equipped with E14 or E27 bases so they can be used as simple direct replacements for ordinary less efficient light bulbs.

### HALOPIN

HALOPIN from OSRAM gives designers greater freedom to produce small stylish halogen luminaires. These tiny line voltage halogen lamps provide atmospheric light without needing a transformer.

[Read More](#)

### DECOPIN

With this lamp OSRAM is successfully continuing the trend in miniaturisation. The DECOPIN lamp is ideal for developers to create small stylish halogen luminaires of simple straightforward design.
