DECOPIN

DECOPIN

For new exciting luminaire solutions

Big on benefits, small in size – DECOPIN from OSRAM. The world's smallest and lightest line voltage halogen lamp offers new freedom for designers thanks to its tiny dimensions. The attractive aluminum reflector on the DECOPIN lamp has optimized faceting and shiny on the inside and matt on the outside. This halogen lamp is unbeatable for illuminating cupboards and work surfaces with directional light. Its simple G9 plug base system is used throughout the world.

Product benefits

- Incredibly small dimensions for revolutionary new luminaire designs
- Elegant aluminum reflector with optimized faceting
- No transformer required
- Robust filament design thanks to innovative, unique bulb pinch technology
- Complies with the IEC 60432-2 standard thanks to the integrated safety function; the lamp shuts down reliably
- Approved for use in open luminaires to IEC 60598-1
- UV filter
- Simple handling thanks to G9 plug-in base/holder system
- Dimmable
