HALOLUX

The bright alternative to the ordinary light bulb

The HALOLUX lamp assortment makes even conventional luminaires radiate with brilliant white halogen light. A good choice for foyers, conference rooms, retail outlets or the home. Simply replacing an ordinary light bulb with a HALOLUX from OSRAM of the same wattage produces up to 30% more light and a lamp that will last twice as long. There are lamp types available for almost all bulb shapes. HALOLUX lamps do not require a transformer.
