HALOPIN

The minis for line voltage

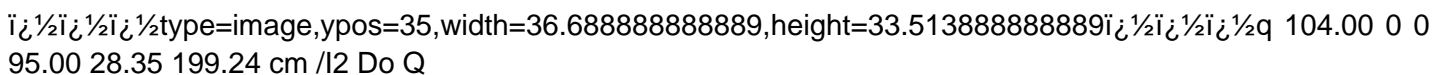

HALOPIN from OSRAM gives designers greater freedom to produce small stylish halogen luminaires. These tiny line voltage halogen lamps provide atmospheric light without needing a transformer – ideal for homes, bars and hotels. Thanks to its bulb pinch technology and integrated safety function, the lamp meets the strict safety requirements of IEC 60432-3 because it safely and reliably shuts down at the end of its life. This halogen lamp is also available of course as an eco-friendly ECO version.

HALOPIN ECO

The ECO version of this lamp offers energy savings of up to 20% and enables new luminaire designs to be created thanks to its reduced thermal output.
