HALOSPOT

Spotlight on a real power pack

In shops, hotels and restaurants, for architectural lighting and shop window displays – in fact wherever high-intensity light is needed to create strong accents, HALOSPOT from OSRAM is the light source of choice. With its powerful spotlight this reflector lamp turns any room into a fascinating set. With HALOSPOT lamps there is no chance of heat building up behind suspended ceilings. The special reflector ensures that all the heat generated by the lamp is emitted forwards. HALOSPOT from OSRAM can therefore be operated as a free-burning lamp with no problem at all. And of course there is also a particularly eco-friendly version of this halogen lamp.
